

ENDYMED PRO 3 DEEP

Dramatic Skin Tightening

EndyMed Pro is the latest, state of art medical device on the market for **skin rejuvenation**. It uses patented Radio Frequency (RF) technology and has an excellent safety profile for all skin tones and colours. This new machine is already being used and recognised by Plastic Surgeons world wide for its incredible skin toning and tightening effect on the face, neck, chest and arms and is currently being used by many surgeons instead of blepharoplasty (eyelid surgery). We receive many referrals from doctors and surgeons.

Fractional Resurfacing

EndyMed Pro also offers fractional resurfacing. Resurfacing refers to the removal or ablation of skin tissue so new tissue can be reformed. When the skin is removed fractionally it means that specific small areas are removed (5 - 10%) each treatment. New skin is then created resulting in a smoother, more radiant complexion with reduced lines/wrinkles and scarring.

Free Consultations available.

N LITE V LASER FOR:

- Skin Rejuvenation
- Lines and wrinkles
- Acne Scars / Acne Vulgaris all types / Acne Rosacea
- Traumatic scarring
- Vascular Lesions / Birthmarks / Thread Veins / Rosacea
- Skin Tightening
- Warts and Verrucas

N-Lite V is a medical laser which has been engineered to supply exactly the right amount of energy to small blood vessels taking them to the brink of damage. This maximises collagen stimulation without causing long-term impairment so is good for treating scars, lines/wrinkles and acne. These small vessels can also be completely destroyed when treating vascular lesions, verrucas and warts. This laser offers swift and effective treatments with no need for cooling or anaesthesia.
